| Other fuels                  |       |  | 691g/kWh   |
| Overall average              |       |  | 225g/kWh   |
| High level radioactive waste |       |  | 0.007g/kWh |

'Fuel Mix' refers to where we source the total amount of Electricity purchased for supply by PFP Energy (renewables = solar, wind, wave, geothermal, biomass etc.).

Figures are for the period 01 April 2017 – 31 March 2018.

We buy energy from existing suppliers and generators. We aim to strike the best balance between low prices and reducing carbon emissions over time.
