'Fuel Mix' refers to where we source the total amount of electricity purchased for supply by PFP Energy (renewables = solar, wind, wave, geothermal, biomass etc).

### Figures are for the period 01/04/2019-31/03/2020

We buy energy from existing suppliers and generators. We aim to strike the best balance between low prices and reducing carbon emissions over time.

*This fuel mix does not include our recently launched renewable electricity tariffs. Fuel mix figures that include these tariffs will be available Sept 2021.*
